*Applicable for all customers subscribing to IONITY PASSPORT MOTION or PASSPORT POWER the first time. Not applicable when switching from IONITY PASSPORT MOTION and IONITY PASSPORT POWER or vice versa.

This one matches you, if you mostly take short to medium journeys. The low monthly subscription fee pays off already from just one charging session per month - equivalent to approximately 150 km (at an average consumption of 20 kWh/100 km).

That one's right for you if you drive long distances frequently. You charge more than two times per month and the subscription fee already pays off and you fully benefit from the lower kWh price - equivalent to more than 300 km covered (with an average consumption of 20 kWh/100 km).
