The IRENA Coalition for Action brings together leading renewable energy players from around the world with the common goal of advancing the uptake of renewable energy. The Coalition facilitates global dialogues between non-governmental and governmental stakeholders to develop actions that increase the share of renewables in the global energy mix and accelerate energy transitions. The Coalition's Working Group on Community Energy focuses on driving community energy investments and promoting policies that empower communities and citizens to participate in energy decision making.

Using a case study approach, the white paper highlights the different ways in which communities actively participate in energy decision making around the world and harness renewable energy's potential to deliver economic, social and environmental benefits for a just transition. The paper also provides a checklist and additional resources that energy communities could consider when developing a renewable energy initiative. The following key takeaways from 11 featured case studies may serve as inspiration for communities on how to set their initiatives up for success:

September 23, 2020 | Knowledge Centre, Reports

The Project Navigator's Learning Section contains technical concept guidelines for various renewable energy technologies, including bioenergy, geothermal, minigrids, small hydropower, solar PV, and on-shore wind.

The Project Navigator's Interactive Workspace enables developers to link knowledge and tools to develop projects, track progress, identify gaps, and export work with dedicated templates.

The Financial Navigator features a search engine that provides detailed information on some of the most important renewable energy funding sources worldwide to assist developers in the realisation of their projects.

Address risks and make informed decisions to develop a bankable renewable energy project
