

Jackery explorer 290

Jackery explorer 290

Here are some technical specifications of the Jackery 290:

In this detailed article, we will explore what the Jackery 290 can run during camping, hiking, or kayaking adventures.

The Jackery Explorer 290 Portable Power Station can charge various small appliances, including smartphones, drones, lights, TVs, portable fans, CPAP machines, laptops, and more. It can also charge the car fridge and other appliances in the vehicle to protect the car's battery. This will ensure that your essential appliances remain powered when you are camping in the woods, hiking up a mountain, or paddling on a serene lake.

Let's check out the running time of Jackery 290 when it charges a particular appliance:

Working Hours = Jackery Explorer 290 Portable Power Station Capacity in Wh x 0.85 ÷ Operating Wattage of the Appliance

Note: We have multiplied the battery capacity by 0.85 because there will be some kind of power loss when charging the electrical appliances. The value provided by the formula is calculated when the power station is fully charged and may differ from the actual number.

You can quickly recharge the Jackery Explorer 290 Portable Power Station with a car charger, wall outlet, and Jackery SolarSaga 100W Solar Panels. Whether you're indoors, outdoors, traveling, or dealing with brief power outages, you'll have some way to recharge the portable power station. It also features a pass-through charging mechanism, allowing you to recharge the power station when it is charging the appliances. However, it's advisable to avoid the prolonged use of this feature to maintain optimum battery health.

The Jackery Explorer 290 Portable Power Station ensures you can reconnect with nature without giving up on modern conveniences. With the power station, you will have the ability to power the lantern to light up the tent in a secluded forest. You can also charge the portable fan to enjoy a cool breeze on a hot summer day or keep drinks chilled with a mini fridge.

Running Time When Fully Charged

Note: The working hours of the Jackery Explorer 290 Portable Power Station mentioned in the table are calculated after fully recharging it.

Whether you're planning a short day hike or a multi-day trek, the Jackery 290 can be a reliable solution to charge appliances whenever needed. The power station can charge smartphones and laptops to ensure you are

Jackery explorer 290

never out of touch. During longer hiking adventures, the Jackery 290 can charge a portable coffee maker to make a hot cup of coffee whenever you need a boost.
