Company Registration No.

energy efficiency Malaysia | home solar system | residential solar panels | solar investment plan | solar farm | solar battery | commercial solar financing | Sitemap

Potential savings are derived from lower Solar PV Electricity Tariffs (compared to existing grid tariffs). As the Solar PV Tariff is fixed throughout the contract, customers benefit from the assurance that that tariffs will not increase.

By minimising carbon emissions, organisations decrease their environmental impact, improve operational efficiency, improve reputation, and maximise stakeholder involvement in addition to reducing costs.

As the world becomes increasingly aware and conscious of sustainability, green business practices provide a framework for the future, enhancing your reputation and making you more attractive to stakeholders.

In a landmark move towards sustainability, Robinsons Hotels and Resorts...
