

Leasing solar panels from sunrun

Leasing solar panels from sunrun

As subject matter experts, we provide only objective information. We design every article to provide you with deeply-researched, factual, useful information so that you can make informed home electrification and financial decisions. We have:

Sourced the majority of our data from hundreds of thousands of quotes through our own marketplace.

Incorporated third-party data and information from primary sources, government agencies, educational institutions, peer-reviewed research, or well-researched nonprofit organizations.

Built our own database and rating system for solar equipment, including solar panels, inverters, and batteries.

We won't charge you anything to get quotes through our marketplace. Instead, installers and other service providers pay us a small fee to participate after we vet them for reliability and suitability. To learn more, read about how we make money, our Dispute Resolution Service, and our Editorial Guidelines.

Since 2007, Sunrun has been evolving to meet the changing needs of the solar market - they first primarily offered solar leases and power purchase agreements and then expanded to become the largest solar installer in the U.S. Sunrun acquired Vivint Solar in 2020, which helped them reach their current market share of about 13 percent. They have recently begun offering solar-plus-storage to customers in almost all of their operating states and are likely to expand as demand increases. Needless to say, Sunrun is definitely a name you'll come across while searching for the best solar option for your home. Let's take a look at what other consumers like you are saying about the largest solar installer in the United States.

Sunrun's positive customer reviews mention friendly sales representatives and note the simple solar panel installation process,

Sunrun's negative reviews mention hefty cancellation fees and misleading claims made by sales reps that the company does not follow through on.

You can receive multiple quotes, look at customer reviews, and compare your options from Sunrun and other solar companies on the EnergySage Marketplace.

Founded in 2007, Sunrun has become the largest solar panel system installer in the United States, operating in 20 states, Washington, D.C., and Puerto Rico. Now-CEO Lynn Jurich founded the San Francisco-based company to develop a "solar as a service" business model. Sunrun is publicly traded (NASDAQ: RUN) and made its initial public offering in August 2015. In 2021, the company earned \$1.6 billion. Sunrun has raised over \$300 million in investor funding and reports having over 100,000 customers that have generated over

Leasing solar panels from sunrun

\$4.6 billion in total revenue.

They've evolved their business model over the years, transitioning from a strictly third-party ownership model to offering customer ownership options, leases, and power purchase agreements (learn more about solar financing options). If you live in an area prone to power outages, good news! Sunrun has recently expanded to offer battery storage solutions to new customers via Sunrun Brightbox, a white-label offering of the Tesla Powerwall and LG Chem batteries. They provide a complete package to customers, including installation of Sunrun solar panels and inverters from brands like LONGi and SolarEdge, optional batteries in almost all operational locations, and ongoing panel maintenance.

To determine whether Sunrun is the right clean energy company for you, we created a table that features aggregated satisfaction ratings of Sunrun from various review websites. You can check out reviews from verified EnergySage shoppers on our Sunrun page.
