Dakota Lithium 12v 23Ah Battery with Dual USB Ports & Voltmeter

Built for exceptional performance, energy density, and versatility the Dakota Lithium 12 Volt 23 packs a big punch in a small package. With both USB 3.0 waterproof plugs, standard F12 Terminals, and a built in volt meter, this LiFePO4 battery gives you the freedom, power, and reliability to #GoFurther and #PlayHarder in the most extreme of conditions.

World beating, best in class, eleven year manufacturer defect warranty.

23 Ampere hours. Dakota Lithium batteries provide consistent power for all 23 Amp hours. DL LiFePO4 batteries have a flat voltage curve, which means they have a steady power output as the battery discharges. The power output will not dramatically drop like similar sized SLA batteries, especially in cold temperatures. You get all the juice down to the last drop.

F2 Terminals (spade socket). When used in salt water, or corrosive, environments we recommend applying a small amount of dielectric grease on the blades of each terminal. It helps extend the lifespan.

Two USB 3.0 charging ports are built into the battery, allowing for easy charging of phones & personal electronics

Voltmeter is built into the battery, allowing for easy real time state of charge readings

5.94"L x 5.11"W x 3.8"H (152mm x 130mm x 99mm). Same length and height as a 12Ah 12V SLA Batteries, wider by 1.5 inches.

6 lbs (2.7Kg). That's 70% lighter than a SLA battery.

Up to 80% capacity for 5,000 cycles in recommended conditions. The typical SLA has 500 cycles. Dakota Lithium batteries last so long that the price per use is a fraction of traditional batteries.

Ideal for rugged & harsh environments. Much better than SLA or other lithium"s. -20?F min, +120?F max optimal operating temps (battery performs well down to -20?F). Avoid charging below 32?F.
