

Lithium portable power station australia

Lithium portable power station australia

Give fuel fumes the flick with an iTechworld portable lithium power station. All the convenience of a portable generator without the smell and noise. Our power stations are ideal for camping and caravanning, and even powering tools on your worksite, during outages and emergencies.

You'll get a powerful, rechargeable lithium battery that's easy to carry, but stands up to our harsh Australian conditions.

Charge your phones, laptop, 12v portable camping fridge and all the other devices that make getting into the great outdoors a more comfortable experience.

Tradies - run your tools, sandwich press, and coffee machine on the job where access to mains electricity is a challenge.

Need a smaller charger? Click the following link to view our lithium portable power bank range, or see our solar blankets.

If you're after something bigger, you might be interested in our inverter generator range or our solar generator line-up.

If you're still learning about these devices, see our post, [Are Lithium Power Stations Worth It?](#) or our piece looking at the portable power station vs portable generator.

There's nothing better than getting out of the big smoke and into nature, but we can't always be completely without electricity for long periods of time. Be it phones, portable fridges, cameras, LED lights or even your sound system, there are plenty of reasons why you need to plug in - even in remote areas.

Thankfully there is an option for campers, workers and outdoor lovers who want to be well off the beaten track, but not without home comforts. They're called power stations. These power stations can be charged through a mains connection at home before you leave on your trip, via your car battery on the way or through portable solar panels in situ.

I've been using them for years, and have been sent power stations from many manufacturers to test and experience in that time. What is the best power station in Australia? Well, it depends on your needs. Below, you'll find a breakdown of the power stations I think you should be considering and why.

Lithium portable power station australia

I have personally experienced or owned almost all of the power stations in this list, comparing them during my outdoor adventures. In addition to my impressions, I've also looked at the average customer ratings at established ecommerce sites like Amazon and eBay (as of the end of 2023), user reviews on sale portals like Snowys, Anaconda, Tentworld and BCF, and the opinions of other professional reviewers and tradies.
