Lockheed Martin is a leading global security, defense and aerospace ...

This is a list of aircraft produced or proposed by the Lockheed Aircraft Corporation from its founding as the Lockheed Aircraft Company in 1926 to its merging with Martin Marietta to form the Lockheed Martin Corporation in 1995.

Ordered by model number, Lockheed gave most of its aircraft astronomical names, from the first Vega to the C-5 Galaxy. Aircraft models listed in italics and with higher numbers - 780 following 80 and preceding 81, for example - are variants or developments of the base model.

Helping the future arrive is what we do. We solve the great problems of our times. We create the innovative technologies that define eras. While no one knows what's going to change the world next, we're probably already working on it.

As a global security, innovation, and aerospace company, the majority of Lockheed Martin's business is with the U.S. Department of Defense and U.S. federal government agencies. In addition, Sikorsky (a Lockheed Martin Company) provides military and rotary-wing aircraft to all five branches of the U.S. armed forces along with military services and commercial operators in 40 nations. The remaining portion of Lockheed Martin's business is comprised of international government and commercial sales of products, services and platforms.

What:Don't miss this rare opportunity to watch the NASA X-59 be unveiled at Lockheed Martin's legendary Skunk Works® in Palmdale, Calif.Who:Lockheed Martin and NASA executives, X-59 subject matter experts, California and Federal Government officialsWhen:1 p.m. Pacific Time, Friday, Jan. 12, 2024Where:The ceremony will stream live on theNASA+streaming service. Coverage also will air on NASA Television, theNASA app, and on the agency'swebsite. Learn how tostream NASA TVthrough a variety of platforms, including social media.

Background: The NASA X-59, designed and built by Lockheed Martin at its famed Skunk Works facility, is specifically shaped to quiet the perceived sound of a sonic boom that reaches the ground to that of a gentle thump, similar to a car door shutting in the distance.
