

London energy transition

Geopolitical tensions and national elections in leading energy producing and consuming countries this year are generating major challenges and risks for the energy transition, but the need for urgent global action remains clear.

Upstream and Recharge invite you to our fifth annual Energy Transition Forum, where we bring together a mix of industry, technology, policy and thought leaders who are driving the transformation of the energy landscape.

The Energy Transition Forum 2024 will take place at the Banking Hall in London, just weeks ahead of the United States election and the United Nations' COP29 climate conference in Baku, Azerbaijan – so we will have many important subjects to address, including how the energy sector can accelerate progress towards emission-reduction targets – even in a rapidly changing political landscape.

Explore silver-bullet technologies aimed at making the energy transition a reality.

Learn how key players are implementing their decarbonization strategies and how they tackle challenges faced along the way.

Learn from and collaborate with various players across the energy community to deliver an efficient energy transition.

Financing options and strategies to reach industry targets.

Looking at how the energy sector can accelerate progress towards emission-reduction targets despite a rapidly changing political landscape.

Discussing changing regulations in the energy sector.

Upstream reports on the key oil and gas stories from across the globe. We deliver news on the key players and the latest opportunities in oil, LNG and shale. Stay ahead of the pack with our round-the-clock news service and thought leadership from industry experts. Upstream is an award-winning global oil & gas news provider, offering a weekly edition available both digitally and in print, as well as an unparalleled round-the-clock digital news service.

Hydrogen Insight was launched in 2022 as a spin-off from energy transition publication Recharge. Our mission is to deliver engaging and independent business journalism and insight to executives and leaders in the global hydrogen industry. We will focus on delivering the news and analysis that matters, fearlessly looking beyond

London energy transition

the hydrogen hype to provide a balanced view of the market, giving readers the knowledge they need to make critical business decisions.

Unrivalled renewable energy news
