

Lowest price solar panel online

Lowest price solar panel online

Currently, the average price of a solar panel system install in the U.S. is \$2.91/W. The ...

The best cheap solar panels in 2024 come from LONGi, Canadian Solar, Trina Solar, JA Solar, and Qcells.

Our solar experts ranked these panels by value, warranty, module quality, and company financial performance.

The national average cost of solar panels in 2024 is roughly \$3.00 per watt - but any installation under \$2.85 per watt can be considered cheap.

The total cost of your installation can be lowered with the federal tax credit and any other local incentives.

Purchasing used solar panels or DIY solar can cut costs significantly, but we do not recommend either.

As of 2024, home solar installations can cost anywhere between \$18,000 and \$20,000. While solar can be a great addition to most homes, it's a huge investment.

Most Canadian Solar models have a standard 12-year product warranty and a 25-year performance warranty with a degradation rate of 0.55% per year. These warranties fall within the industry standard, but there is definitely room for improvement.

Canadian Solar offers a number of high-efficiency models that may cost a little more money, but they'll still be cheaper than premium brands like SunPower.

Why we chose them: Trina Solar is a well-established solar panel brand offering cutting-edge technology and long-lasting value. The China-based manufacturer offers a 25-year product and performance warranty. Their performance warranty promises no less than 84.8% output by the end of the 25-years

Why we chose them: JA Solar is a China-based solar manufacturer with several global offices, including one in San Jose, California. Just like other panels on this list, JA panels offer half-cut cells and PERC technology to make them more efficient.

Disclaimer: We urge anyone buying solar panels not to try to cut corners if they want the best results. Even if DIY solar and used solar panels are cheaper, we do not recommend them to customers. For this kind of investment, cheap doesn't always mean good.
