

Luxembourg city energy storage systems

Luxembourg's energy system is characterised by high import ...

Luxembourg's integrated national energy and climate plan (PNEC) is an important element of the Grand Duchy's climate and energy policy. It sets out the national climate and energy objectives for 2030, as well as the policies and measures needed to achieve them.

The measures apply to six sectors, namely:

The Energie- a Klimaplang fir Lëtzebuerg is also a strategic document enabling Luxembourg to make an active commitment to climate action and the energy transition, as well as to the development of a sustainable economy. It is a direct response to both the climate crisis and the energy crisis.

The PNEC is the result of an intrinsically collaborative approach between the ministries and administrations concerned, coordinated by the Ministry of the Environment, Climate and Biodiversity and the Ministry of Economy.

The ambitions and enhanced measures set out in the PNEC are also based on the results of various public consultation and institutional cooperation processes carried out in recent years.

Citizens and scientists alike have come out in favour of even more ambitious targets and measures for Luxembourg in the future:

A public enquiry, open from 17 April to 16 May 2023, was also an integral part of the procedure, inviting citizens to submit their comments and proposals on the project.

The intermediate targets by 2030 are

The long-term objective is to achieve climate neutrality, or zero net emissions in Luxembourg by 2050 at the latest.

The Energie- a Klimaplang fir Lëtzebuerg presents both reinforced and new measures. The plan includes a total of 206 different measures, and particular attention was paid during the review process to the "just transition".

These measures correspond to different types of instruments, are at different stages of development, have different deadlines for implementation and identify different players responsible. And some measures are proving to be the most important and/or innovative compared with the previous version of the plan:
