Mexico panasonic solar panels

Revisar Panasonic Paneles Solares Paneles Solares - Panasonic México ...

Especificaciones - VBHN325SJ47 - HIT - La estructura de los módulos solares HIT(TM) ...

We are proud to be an Authorized Reseller of over 100 different solar power manufacturers. All specializing in delivering every component you need for your renewable energy system.

Solaris is a leading online solar energy supply store, providing a wide variety of products and manufacturers to cover your needs, while maintaining competitive in the solar energy industry. So you can go on and get the best returns on your solar energy investment.

Panasonic Eco Solutions (formerly Sanyo), has been a household name brand for nearly a century. The company is now manufacturing and providing some of the highest quality photovoltaic modules available on the market today. They have produced over 1 billion solar cells to date. Panasonic is an industry leader and pioneer with solar technology for over 40 years, continuously refining their products efficiency and quality with the most advanced R& D departments in the world. Recognized and highly evaluated with numerous global awards, Panasonic remains on the forefront of solar industry.

Panasonic has earned a reputation for providing best-in-class reliability, quality and efficiency for their solar panels. For over 40 years, the company has been researching and developing their special amorphous solar cells, defining progress within the solar industry. Over 17 years they spent manufacturing the HIT series solar panels. Panasonic is known on a global scale with one of the largest production capabilities of any solar manufacturer, achieving over one billion solar cells in accumulative production.

Panasonic research and development achieved the world's highest solar cell conversion efficiency rating at the R& D level – 25.6% as of 2014. The company has received many accolades and awards for their breaking the world record of conversion efficiency and making contributions to the renewable energy society. Their solar panels come highly regarded, and are recommended as a high-quality solution to residential and commercial systems alike.

During the 2000's and beyond, Panasonic as gained footing in the global market for numerous achievements as a tier one manufacturer in all markets they serve. Notably, In July 2014, it was announced that Panasonic has reached a basic agreement with Tesla Motors to participate in the Gigafactory, the huge battery plant that the American electric vehicle manufacturer plans to build in the U.S. In August 2014, Tesla said the plant would be built in the Southwest or Western United States by 2020. The \$5 billion plant would

Mexico panasonic solar panels

employ 6,500 people, and reduce Tesla's battery costs by 30 percent. The company said it was looking at potential sites in Nevada, Arizona, Texas, New Mexico and California.
