

Mobile ev charging service cost

Mobile ev charging service cost

Today the cost is an average of \$80,000 for EV charging hardware (per charger), \$1.5M in annual energy costs, and \$2M for a one-time investment for extended grid connection. Electric Vehicle (EV) Charging Grid

The company's modular, portable system--called the Roadie--is designed to make DC fast charging mobile. Now, EV drivers can order a charge at the push of a button on a smartphone app the way you might order a rideshare vehicle--anytime, anywhere.

EV owners can have reduced range anxiety knowing that these portable EV chargers can reach their stranded EV anywhere. The Roadie makes it possible for you to provide roadside service when EV drivers are in an emergency or need routine charging.

SparkCharge tells up that for as little as only \$25 per month, ChargeUp will come to you and DC fast charge your EV wherever you want them to - at home, work, or any location you're vehicle is...

Our mobile charging-as-a-service program, SparkCharge Fleet provides businesses with turnkey electric vehicle charging. With the Fleet program, there's no need for the installation, permitting, or upfront costs associated with traditional fixed electric vehicle charging stations.

Seriously? Only \$25 per month for a mobile DC fast charging service? It sounds too good to be true. We'll find out tomorrow when Sparkcharge, the mobile EV charging startup that recently received a million-dollar investment deal on Shark Tank with Mark Cuban and Lori Greiner, is hosting its second annual "SparkDay" event tomorrow at 2:00 pm Eastern.

SparkCharge began hosting annual SparkDay events in 2020, as a way to let the public know what the company has been up to in the previous year. A lot has happened for the company since SparkDay 2020, and we'll get to hear all about it tomorrow.

Follow this link to view the presentation live on [YouTube](#) and ask the team questions in real-time.

One big announcement we're really interested in learning more about during SparkDay is the company's new charging as a service (CaaS) offering called ChargeUp.
