Octopus buy back tariff

The Outgoing Octopus tariff is the price we pay you for electricity you export to the ...

Outgoing Octopus: a variable tariff that allows you to sell your excess solar for a flat unit price of 15p per kWh. Agile Outgoing Octopus: priced dynamically, with a unit price that changes every half an hour - allowing people generating green energy at home to take advantage of the highly variable wholesale cost of energy throughout the day, and export at the most valuable times.

Modern slavery statement.

To maximize your earnings from excess solar generation, it's important to pick the right Octopus export tariffs -- because your solar panels deserve to pay their way too! With my recent installation of solar panels and battery storage, I've become slightly obsessed with the weather, energy consumption, and getting the best possible deal on my export tariffs. Octopus Energy offers a range of innovative export tariffs that can seriously impact how much income you generate from exporting your solar energy back to the grid. Choose wisely, and you'll turn your panels into reliable money-makers giving you credit each money on your Octopus Energy bill.

I've been an Octopus Energy customer for 6 years now, and am taking steps to electrify my home. My main goal is to be self-sufficient and generate and consume my own energy. However, there will be times when I can share my solar power and export it to the national grid. I appreciate how Octopus prioritises excellent customer service and environmentally friendly tariffs that make this rewarding. Their commitment to sustainability not only helps reduce my bills but also allows me to contribute to a greener future.

If you are interested in green technology Octopus Energy is without doubt the energy supplier to be with! In this review of Octopus export tariffs for 2024, I will explore these options in detail. If you have any questions drop me a message or reach out to me on Twitter.

Written by Sarah Chambers

Octopus Energy stands out as the top provider of cutting-edge environmentally friendly tariffs. Their solar export rates are among the highest available, and when paired with one of their exclusive Octopus smart tariffs, they can significantly lower your energy costs.

Octopus buy back tariff

Choosing a tariff may feel overwhelming with so many options available, but the range of choices allows customers to customise a tariff to suit their unique green home setup. Each home is different, and with the addition of green technology, having a variety of options is essential to maximise energy bill savings.

If you haven't had solar panels installed yet here's my review of my recent Octopus Energy solar and battery installation. Yes, this is me in the video below too.
