OurOffset Nonprofit LLC. Impressum

We offer complete help in English, from planning to installation, for those living in Hungary. Our team makes going solar easy and hassle-free for non-Hungarian speakers.

Thanks to the energy storage unit, the property can meet its full energy needs (with conscious energy management).

Particularly beneficial where there is no nearby electrical grid, or where connection to it would be overly complex or costly relative to the amount of consumption.

The use of solar panels does not produce any harmful emissions, which is vital in the fight against climate change.

With just a few simple steps, you too can achieve energy independence!
