

Office energy storage sarajevo

This will only take a second!

Alfa energy group is an international energy consultancy specializing in energy cost management. The company's focus is on building business energy strategies for all industries and keeping them running.

We work driven with the desire to professionally and jointly contribute to the improvement of working and living conditions, increase savings in terms of reducing energy costs, contribute to the safe and harmless provision of energy needs, all in the function of the Energy Turn as a global milestone.

Our experts worked within various projects, contributing to local communities, which created a great link with local authorities all over country.

The association brings together a team of people (Think Tank/expert Hub), who are prominent activists in Earth protection, designers, professors at the various faculties, consultants and experts from the SEE region. We work driven with the desire to professionally and jointly contribute to the improvement of working and living conditions, increase savings in terms of reducing energy costs, contribute to the safe and harmless provision of energy needs, all in the function of the Energy Turn as a global milestone.

Many years of experience in the fields of energy, energy efficiency, renewable energy, environment, climate change but also in the field of legislation, finance and energy management.

Globally, there is a general push towards renewables.

All over the world, cities face enhanced flood-risks due to storm-surge and more frequent and heavy rainfalls.

U okviru projekta „Buduće perspektive Zelenog certificiranja“, Udruženje Centar za energiju, energijsku efikasnost i okolinu (CEEEO), uz podršku Opštine Novo Sarajevo, organizovalo je edukaciju "Zeleno certificiranje" u mjesecu oktobru u Međunarodnom centru za djecu i...

The CEEEO team recently participated in a study visit to Fuchstal in Germany, as part of the project "Analysing and promoting energy storage solutions, developing tools to mitigate the intermittency of RES, contributing to an accelerated transition to renewable energy..."

Edukacija se organizuje u okviru projekta „Buduće perspektive Zelenog certificiranja“, koji ima za cilj unaprijediti zaštitu okoliša kroz povećanje svijesti o održivom upravljanju i primjeni certificiranih proizvoda, procesa i sistema upravljanja. Projekat...
