

Ovo energy electric vehicle charging

Ovo energy electric vehicle charging

The UK's cheapest home EV charging. Add Charge Anytime to any OVO energy tariff for free - and save up to £542 a year when you smart charge your EV from home. Not with OVO? You can still check your compatibility before you switch.

Smart charging is a greener way to charge your car. Just choose your next-generation smart charger and our expert team of engineers will take care of fitting it - whether you're an OVO customer or not. Plus, the Hypervolt Home 3 Pro charger is compatible with Charge Anytime - our free add-on.

Smart charge your electric vehicle for 7p per kWh whenever you need to, Now available to be added to any OVO plan, including electric-only households, intelligently optimises your charge for when the energy is at its greenest.* Am I eligible? You can see all eligibility details in our Charge Anytime page here.

OVO Energy Ltd. 2009, Bristol, OVO Energy? OVO Energy???

Updated on 15/01/24 by Emmanuelle_OVO:

You can see all eligibility details in our Charge Anytime page here.

*Our smart tech will aim to charge your car at a time when the grid has more renewable energy in it. Meaning it's less likely your EV will be charged by energy from fossil fuels.

I'm currently with British Gas and looking to switch to ovo. I have 2 ev's with a home pod point charger. Would this charger be compatible?

Your BMW iX3 is compatible via Direct-To-Vehicle Mode. You'll be good to go with this EV.

A couple of models of the Indra Charger are currently compatible, you can see them here

It is quite fast moving, so others may be added.

Just a personal thought. The closest tariff is currently from Octopus. For flexibility it might be worth looking at the Ohme chargers as some of the models are on the compatible list of both Intelligent Octopus and OVO Drive Anytime. No one knows which tariff will be more competitive in a few months.
