

Paris electric vehicle incentives

Paris electric vehicle incentives

Broadly speaking, there are three main measures in place:

The list of vehicles that people can buy with government aid has been released. We explain how this scheme works and present the 22 cars that are eligible.

President Macron announced the vehicles eligible for this bonus ?cologique, alongside the launch of the EUR100-per month rental scheme for electric cars on December 14.

In both schemes, almost all of the cars are produced in France or in Europe.

The bonus ?cologique scheme provides financial aid of up to EUR6,000 - or 27% of the cost of a vehicle - to buy a car with a low carbon footprint. It can also be used to lease an eligible vehicle.

While the aid previously also applied to used vehicles, President Macron confirmed that only new cars will be eligible.

Full information on the scheme can be found [here](#).

The complete list is as follows:

Renault to launch electric car costing less than EUR20,000

Beware of the increasingly common crime of "quishing" via QR code

French financial aid to buy new electric vehicles set to fall according to a leading auto magazine

It's worth checking out your regional incentives, as some may offer extra subsidies. For more information on your local EV incentives, a quick internet search of "EV incitations + [nom de votre r?gion]" ("EV incentives + [name of your area]") should point you in the right direction. Most regions will allow you to apply online, via their Aid Portal or region's government website.
