The General Directorate of Natural Resources and Energy of the Ministry of Infrastructure and Natural Resources installed a photovoltaic system in March 2021, funded by the United Nations Development Programme and by the Global Environment Facility.

The Fishermen and Palai's Association of Messias Alves beach, in the district of Cantagalo, was implemented a Photovoltaic Solar System in July 2020, with the support of the Directorate General for Fisheries and financed by the Japanese International Cooperation Agency.

ALER with the support of Instituto Camões and UNIDO published on November 2020 the renewable energy status report of São Tomé and Príncipe.

These market overviews aim to provide a brief overview of the renewable energy sector in the PALOP countries and list the main existing or planned programs and projects. They work as a summary of ALER's reports and privileged information that ALER has access.

The President of the Democratic Republic of São Tomé and Príncipe ratified the Agreement for the Establishment of the African Legal Support Facility (ALSF), through Presidential Decree no. 11/2024.

São Tomé and Príncipe will have a new photovoltaic power station to produce more than 10MW of energy, in a 60.7 million dollar project co-financed by the World Bank, the African Development Bank and Japan.

The international financial institution has around 30 million euros in its portfolio to finance renewable energy production projects in São Tomé and Príncipe.

The United Nations has declared 26th January 2024 the first International Day of Clean Energy and ALER marked the date with the release of the latest data on the incorporation of clean energy in Portuguese-speaking countries.

The latest legislation applicable to the energy sector is now available online at [LERenováveis](#).

According to the International Energy Agency (IEA), global renewable electricity capacity increased by 50% between 2022 and 2023, and the next five years will see the fastest growth ever. However, the lack of funding for emerging and developing economies is a problem.
