The Jakiper 48V Server Rack Battery contains the latest LiFePO4 lithium cells, which means it combines exceptional performance with a long-lasting lifespan. One of the things that sets this deep-cycle battery apart is the fact that it offers truly outstanding value. Typically, you would expect to pay far more for a battery of this quality.

Comes as a kit. Assembly requires installation of 100 #3 Philips screws. Seems sturdy after Assembly. Overall size is 20" W 18" D (battery extended beyond the rack) 74.25" H (42.75" without casters). Accepts batteries upto 17.75" W 7 3/8" H. Has two mounting holes each side for battery mounting. Only one screw hole lined up one each side for the batteries I am using. I added ground lug at lower left for grounding the rack.

I've had the 48V Jakiper installed for 7 months now. It has steady load through the week and then additional on the weekends. The battery really struggles with cold weather. The menu is also a bit clunky. There are a lot of button presses to get to the battery percentage. I need to look into getting some sort of customizable display. I plan on buying a second one soon.

working as Good, I have total 4 battery.

Arrived just in the nick of time when my main panel failed and I've been off grid for 3 days. Has performed great, no extra heat, build quality is excellent. I'm sticking to charging from solar around 20A as recommended.

What is your return policy?

Returns are free in the first 30 days with no restocking or processing fees, although the customer may be responsible for paying return shipping. See our complete return policy on our Shipping, Delivery, and Returns page linked in the footer of this website.
