Technology - Micro Steam Turbine Generator - Turtle Turbines

Welcome to our steam turbine world. We, as your trusted heat and steam experts, bring over a century of experience and innovation in steam turbine technology. With more than 120,000 steam turbines successfully delivered globally, we stand as a testament to reliability, expertise, and unwavering commitment.

Our steam turbines, built with precision and passion, serve as both generator drives and mechanical drives for compressors or pumps. They form the heart of numerous combined cycle and cogeneration plants and countless industrial applications. This showcases our proficiency in steam turbine technology and our dedication to promoting turbine efficiency.

Utility steam turbines with a power output from 90 to 1,900 MW are used in conventional steam power plants as well as in combined cycle power plants. With more than 8,000 steam turbines in service worldwide we provide proven technology.

Flexibel industrial steam turbines up to 250 MW

As a market leader for industrial steam turbines, we offer a comprehensive range of reliable and versatile steam turbines for the power output range from 2 to 300 MW. Our industrial steam turbines are designed for easy constructability, fast start-up and economical operation.

A comprehensive range of API turbines

Whatever the requirements are, we provide either bare steam turbine drivers to OEMs, or we supply complete packages including gears, lube oil systems and controls. The Dresser-Rand steam turbines cover a range from <10 kW up to 25 MW.
