Solar battery group

Why choose Solar Battery Group? With over 26,000 Installs, we are Australia's ...

Bills are better with a battery. Take charge.

Most Australian households are not home, or use very little power during the day. Energy usage is much higher during the morning and evening. This is why solar battery storage is getting everyone's attention!

Solar batteries simply store unused electricity generated by your solar system during the day, for your own use later. Extending the capabilities of your system to have it working harder for you. When the solar system is no longer producing power your house starts to run from the stored battery power, instead of relying on the grid. Doing more with your own solar before paying your electricity provider. What doesn't sound great about that?

Solar battery storage isn't a one-size-fits-all solution. Your PV solar system and how you use power will help determine the right capacity for you.

Choosing the right battery capacity will see you getting a better return on your investment sooner.

Whether you're just getting started or want to boost your current solar system with a storage battery here is some information about key features and processes we can help you with.

We also use different external services like Google Webfonts, Google Maps, and external Video providers. Since these providers may collect personal data like your IP address we allow you to block them here. Please be aware that this might heavily reduce the functionality and appearance of our site. Changes will take effect once you reload the page.
