Solar battery monitoring system

The SmartShunt is a good alternative for a BMV battery monitor, especially for ...

The Lynx Shunt VE.Can is an intelligent 1000A shunt with location for a fuse (not ...

Solar panels sit on your roof for decades, silently making electricity from the sun, saving you money and saving the planet a little bit each day. Unfortunately, they're also silent when they're not making electricity, for example due to a wiring problem. To make sure your system is working properly, you need a way to check up on them.

Here are the best solar monitoring systems on the market:

If you haven't yet installed solar panels, this may determine your choice between installers, based on what solution they use. If you already have a solar installation but have no way to monitor it, this guide can help you choose a solution that's right for you.

If you're the kind of person who needs the additional functionality, Enphase's monitoring system is second-to-none.

If your solar panels didn't come with monitoring, there are aftermarket solutions to help you track solar production.

Solar monitoring from equipment manufacturers

Solar monitoring from your installer

Standalone home energy monitors

Enphase, which makes solar microinverters

SolarEdge, which makes string inverters and DC power optimizers
