custom-designed collectors for all applications

ESCF-V series flat plate collectors are manufactured according to European standards and have the full-face selective coating aluminum absorber. Solar collectors are equipped with powerful rock-wool insulation and special undivided pre-painted (UV protected color) metal sheet which is certified for endurance in near-coastal areas. The ESCF-V collector has a high efficiency thanks to the Clear light glass panel used which increases the amount of solar radiation on the collectors absorber. ESCF-V solar collectors are suitable for DHW heating, swimming pool heating or any solar thermal application.

for hot water, steam and cooling

solar water heaters | 120L – 500L capacity

GREENOneTEC is the world's largest thermal flat-plate-collector manufacturer with an annual production capacity of more than 1.6 million m² of panels. Eight highly automated, process-secured robotic production lines, offer the highest quality products with excellent delivery performance and reliability - made in Austria, of course, and certified to ISO 9001 and ISO 14001 standards and more than 30 years experience in the solar market.

GREENOneTEC sees itself as a reliable and innovative manufacturer in the solar thermal industry. This maxim has made us the world's leading specialists in high quality solar thermal collectors.

For many industries and business sectors areas, we are now the first go-to company for high quality solutions: GREENOneTEC supplies highly innovative systems and quality products to manufacturers of heating systems, solar system providers and industry. However, we also support our customers in projects with energy companies, public institutions, planners and project developers, as well as with the wholesale trade and industry. Our industrial series production guarantees consistent, first-class product quality with an excellent delivery service and is focused on conserving resources and ensuring cost efficiency. We invest continuously in market innovation and grow alongside our customers.

GREENOneTEC develops and produces the best solar thermal collectors and fixing systems in customized

Solar thermal collector manufacturers

OEM versions. We supply our high performance large-scale collectors to solar thermal power plants and, on the global market for thermosiphon systems as well, our customers trust our innovative system applications.

GREENoneTEC has developed to be the brand for the highest production quality and innovation in the solar market. Praise that brings a lot of responsibility with it. As the driving force in the market, we accept this challenge every day to provide sustainable success for our customers.
