Disclaimer - These instructions are provided as-is, without any warranty. If you're not confident in making these changes you should consult a contractor that is familiar with the Solis Hybrid Inverter. Note that charging from the grid will mean you incur costs, and those are paid by you (not me!).

From the main overview screen, press the ENT button on the inverter. This is the rightmost button beneath the screen. You'll be shown a menu with four options: Information, Settings, Advanced Information, Advanced Settings.

Next press the DOWN button on the inverter until the Advanced Settings button goes white with a dotted border:

The Advanced Settings menu appears with two columns of options. We're interested in Storage Energy Set at the bottom of the left column, so press DOWN until you get there:
