

Sonnen battery hybrid 9 53

Sonnen battery hybrid 9 53

The sonnenBatterie hybrid is a solar battery that provides up to 80 percent of your households' annual energy requirements.

The sonnenBatterie hybrid 9.53 is a single phase battery that is German designed and engineered. Its modular design allows you to adjust your storage capacity to accommodate any changes to your household energy requirements. When combined with an additional accessory of sonnenProtect, then Black Start will battery provide continuous backup power to your home in an event of a blackout.

sonnen uses lithium-iron-phosphate battery cells that is renowned for its reliability, stability, durability and performance. The sonnenBatterie is cobalt-free and more environmentally sustainable.

With over 100,000 units installed worldwide, the sonnenBatterie is trusted by many households. That's why we give a 10-year or 10,000 charge cycle warranty on all components in a sonnen home battery.

We reward our customers with a solar battery storage capacity of 4kWh or more for their clean energy. Stay with your energy retailer and continue to receive a solar feed-in tariff for your contribution to the grid.

There are more people using sonnen products every day and they are part of the sonnenCommunity who share a common goal: clean, reliable and affordable energy for all. Create your own solar power and use it at home and to protect your community from power outages. Join the energy revolution that is the future of energy.

Since our journey began in 2010, our mission has been crystal clear: to pioneer clean, affordable energy for everyone.

Our evolution calls for a brand that mirrors our ambition and our commitment to cutting-edge, sustainable solutions.

It's more than a new logo, new colours and new images; it's a reflection of our journey, our growth, and our future.

The sonnenBatterie is a fully integrated, smart home storage solution made up of safe and long-lasting Lithium Iron Phosphate (LiFePO4) battery modules, an intelligent energy management software and a power inverter.

It is fully-integrated, as there are three components that are designed to work together to offer a high-quality product in one cohesive enclosure. We call this a smart home storage solution, as the energy management software includes a self-learning algorithm that continuously adapts to your consumption patterns to help your

Sonnen battery hybrid 9 53

household achieve the highest self-consumption and energy savings.

The simple answer is: It's one of the safest and longest lasting Lithium Ion chemistries available for home battery systems. We've been testing various battery chemistries since 2010 and have always chosen LFP battery cells over other battery chemistries such as Nickel, Manganese and Cobalt (NMC).
