

Sunrun price per kwh

Sunrun price per kwh

The upfront price for an average-sized residential solar system has fallen from \$40,000 in 2010 to about \$25,000 today. Meanwhile, utility-scale solar now costs between \$16/MWh and \$35/MWh, making it competitive with all other types of energy generation.

If you sign a solar lease, you pay a flat monthly “rent” to Sunrun in exchange for electricity. If you sign a PPA, you commit to paying a fixed rate per kilowatt-hour (kWh) for the electricity your solar panels generate, which means your monthly payment will fluctuate depending on how much energy you use.

But the average cost of a Sunrun project, according to a 2023 report by Lawrence Berkeley National Laboratory, is just over \$4 per watt. A typical Sunrun installation generates 7,500 watts ...

A decade ago, an average 6 kilowatt hour residential solar system could cost more than \$50,000. Now, the outright cost of a typical home installation ranges from \$16,200 to \$21,400, which is a 62% average annual decrease. From the price of hardware to ongoing maintenance, learn more about the cost of home solar.

We use your zip code and electricity bill to build and price your system in seconds.

How much will the overall cost be for a home solar system?

What can I expect for maintenance costs?

How can I take advantage of tax credits?

In a crowded residential solar marketplace, SolarCity and Sunrun are among the most recognizable names in the industry.

SolarCity is perhaps most well-known for its ties to Elon Musk and Tesla, while Sunrun's claim to fame is that they pioneered the business model of solar leasing arrangements, which are a mainstay in the industry today.

Founded in 2006 by brothers Peter and Lyndon Rive, SolarCity is a full-service solar provider headquartered in San Mateo, CA. SolarCity was acquired by Tesla in 2016. Thanks primarily to its affiliation with Tesla, SolarCity is a major player in the energy storage and electric vehicle charging markets, in addition to offering conventional residential and commercial solar products.
