Tokyo utility-scale solar

For more information on the mandatory solar power generation installation measure, please view the Ordinance Revision to Halve Carbon Emissions (Carbon Half) and the Our Homes Will Become Power Generators (Introduction of a new program)

Ordinance Revision to Halve Carbon Emissions

Our Homes Will Become Power Generators

There are concerns that the ongoing climate crisis and the impact of the energy crisis will be prolonged, which is having a significant impact on life and business in Tokyo.

As an area of major energy consumption, Tokyo will accelerate efforts to establish a foundation for a decarbonized society and ensure energy security in an integrated manner in order to realize carbon half by 2030.

Reinforcing, accelerating, and thoroughly implementing sweeping climate change countermeasures in line with the characteristics of Tokyo, We will realize our vision of Tokyo as a more resilient, prosperous, and livable city.

Q Who is responsible for installing solar power generations?

? Major housing suppliers that supply over 20,000 m² of housing on a yearly basis (approx. 50 companies) will be subject to this mandate.

? New buildings are subject; existing buildings are exempt.

? This is a system in which housing suppliers and homeowners/buyers work together to improve the environmental performance of buildings.

Q What are the benefits?
