Getting an opportunity to road test and review a Tesla Model 3 electric car has thus far proved a very difficult task.

This week, my 2014 i3 REx turned three years old; I picked it up on May 21, 2014. For the most part I've been very pleased with the car. It's definitely not perfect, but then again no car is. It has fit my needs and driving demands perfectly and I only needed to drive on the range...

Not so long ago, gas stations and convenience stores seemed to be mutually exclusive businesses—you went to one, or you went to the other. Today, many convenience chains only open new locations that also sell gasoline. Many drivers don't know that gas stations work on the smallest of profit...

As electric-car adoption expands past early adopters into more general buyers, it may be difficult for public charging infrastructure to grow as fast as the number of electric vehicles on the road. Here in the U.S., every month roughly 10,000 new plug-in vehicles are sold or leased—and that...

The Volkswagen diesel emission scandal erupted last September, when the EPA formally issued a Notice of Violation to one of the world's three largest automakers for willfully violating U.S. emission laws for seven years. Since then, much speculation has appeared over what forms of punishment VW...

The full impact of Volkswagen's diesel-emission cheating scandal has yet to be realized, but what it has apparently already admitted to doing could result in the largest civil fine ever levied by the Federal government on an automaker. And that's just the beginning. Besides paying civil penalties...

Last week at the DC Auto Show, BMW, Volkswagen, and ChargePoint jointly announced they would install about 100 DC fast chargers for electric cars.

Their goal is to create "Express Charging..."

This past Wednesday, May 21, I picked up my shiny new 2014 BMW i3 REx range-extended electric car from JMK BMW in Springfield, New Jersey. The car, in Laurel Grey, was the first range-extended i3 delivered in North America, and I will always appreciate that BMW gave me the honor of being the first...

For the majority of the general public to consider purchasing a fully electric car, they first want accessible public charge points located at or near places they frequent in their daily life. It's also clear that most people won't end up using them nearly as much as they think they will. However...

Before the 2014 BMW i3 is officially launched as a production model, the innovative all-electric minicar is going on a whirlwind world tour--chaperoned by its more powerful, sexy, and sleek i8 plug-in hybrid sports coupe sibling. The pair of concept cars just completed the first of seven stops they...
