

Ulaanbaatar battery testing

Ulaanbaatar battery testing

SGS battery testing services can identify your target market regulations for cells, batteries and modules to ensure compliance with contractual or regulatory requirements.

Developing the highest quality batteries, that are safe and reliable, is a complex challenge in today's competitive global market. We can provide expert testing services for abuse, benchmarking, durability, electrical, electromagnetic compatibility (EMC), environmental, life cycle analysis, performance, safety standards and transportation on cells, batteries and modules.

Expert and experienced, we conduct battery comparison testing against both national and international standards, as well as battery life cycle analysis. With an increasing focus on renewables and energy efficiency, we also carry out testing for renewable energy storage systems and energy efficient battery management.

To make supplier selection easier, we also provide side by side comparison data and continued validation.

Unmatched project timelines to get your products to the global market on your schedule, not your partner lab's schedule

A global network of battery testing laboratories

Supply chain management by third party verification of packaging, labeling and certification

All testing, approval, certification and inspection services from small cells to heavy vehicle battery systems

Support at any stage of the product life cycle, such as generation, operation and disposal

Capacity to run multiple large testing projects

Leading the way, our technical experts are active industry committee members, ensuring that our knowledge and understanding is second to none.

Our ISO/IEC 17025 accredited testing laboratories and specialized local experts have extensive experience with battery testing, and offer a range of services to manufacturers and buyers in the industry. With unrivaled experience we can provide all the required technical verifications, safety settings and factory auditing services.
