Ultra rapid chargers uk

Just tap and pay with your contactless card or the InstaVolt app - it's that easy!

We want you to have an enjoyable charging experience, so we've partnered with popular retail and hospitality services, including McDonald's, Costa Coffee and Bannatyne Health Club. This means you can recharge your own batteries while charging your EV.

Using your contactless debit or credit card, simply tap the screen to get started. Alternatively, you can pay using the InstaVolt app.

InstaVolt's DC rapid chargers are designed for any EV with open standard connectors. Just plug in and hit start.

We've introduced an easier way to manage your electric fleet charging.

Discover the different types of EV charge points available to electric vehicle (EV) drivers; slow, fast, and rapid & ultra-rapid chargers.

In short, the different types of EV chargers are; slow, fast, and rapid & ultra-rapid chargers. Your business charging requirements will inform the best charge point infrastructure to ensure EV drivers have a quality experience.

Learn more about EV charging speeds

Stats from Zap-Map show most of the UK's infrastructure is made of fast chargers. You will typically find fast chargers in the workplace and car parks throughout the UK, as they provide a more cost-effective way to charge if you have a bit more time.

If you have a home EV charger installed, you will likely only be able to achieve a maximum of 7.4kW.

Next-level EV charging, rapid and ultra-rapid chargers are perfect for a quick turnaround and are usually found on major routes, at charging hubs, and on-the-go locations.

With speeds of between 50-150kW (rapid) and 150-400kW (ultra-rapid), these chargers allow you to fully charge (80%) in 10 minutes – 1 hour. The share of EV rapid and ultra-rapid charge points in the UK is accelerating. This trend will vastly impact electric vehicle drivers, slashing recharging times and massively reducing range anxiety among electric vehicle motorists.
