Official websites use .gov A .gov website belongs to an official government organization in the United States.

Secure .gov websites use HTTPS A lock () or https:// means you've safely connected to the .gov website. Share sensitive information only on official, secure websites.

And make sure all of the requirements set by the IRS are met. See below.

Most dealerships will take care of the tax credit during the purchasing process. If not, you can submit IRS Form 8936 when filing your taxes.

The same day from the car dealership, or when you get your tax return.

The IRS has set a handful of requirements a person must meet to qualify for the electric vehicle tax credit, including income, etc. Click the links below to review the requirements.

This depends on several factors such as the vehicle's MSRP (price), its final assembly location, battery components, and more. Check the links below to see the new and used vehicles that are currently eligible for a tax credit.

If you're upgrading to an electric vehicle, consider buying a home charger or battery, and installing components and parts (e.g. outlet, wiring, or electrical panel) that facilitate faster charging at your home. You may be able to claim a tax credit up to \$1,000 for each charging port and for each energy storage property. Find out if your home is in an eligible location and see more detail:

Use the Driving Electric Local Fuel Savings Calculator below to compare the cost of driving a battery electric vehicle (BEV) or a plug-in hybrid electric vehicle (PHEV) to a conventional vehicle where you live.

If you bought a new, qualified plug-in electric vehicle in 2022 or before, you may be eligible for a clean vehicle tax credit up to \$7,500.

With more mainstream curiosity surrounding EVs, bolstered by a ten year extension in federal tax credits under the Inflation Reduction Act, there's never been a more exciting time to buy an EV, and there has never been a wider selection of options to choose from. What many US consumers may not be aware of, however, is what electric vehicle tax credits may be available to them at the state level in addition to discounts or money back on EV charger installations. Luckily for you, we've broken it all down, state-by-state, below. Note: This data has been updated as of July 2023.

The benefits will not last forever, but to further EV adoption in the US, the federal government and its respective state entities offer several perks to consumers looking to go all-electric. With the newly signed Inflation Reduction Act, we know federal tax credits for electric vehicles are extended for another decade, but state credits and rebates move at an entirely different pace.
