Lithium has a boxed warning from the Food and Drug Administration (FDA) about lithium toxicity. This refers to a high level of lithium in your blood, which can lead to serious side effects. The boxed warning appears on the drug's label and alerts you to possible serious risks.

If you have bipolar disorder, your medical professional may prescribe a drug called lithium.

Lithium is used for the following purposes in adults and some children:

Lithium's classification (the group of drugs it belongs to) is a mood stabilizer. It's a generic medication.

If you'd like to learn about lithium ER tablets, your medical professional or pharmacist can tell you more.
