Wilson cb antenna official website

Our Wilson Antenna brand is renowned for producing high-quality and durable CB antennas that cater to various needs, from magnetic mounts to trucker-specific models, ensuring powerful signal reception and transmission capabilities.

As a leading manufacturer of CB antennas and cellular signal boosters, our product lineup from Wilson Antenna comprises a wide range of innovative solutions to keep you connected, including:

The Wilson 305-38 300-Watt Little Antenna is a compact yet powerful CB antenna that combines a heavy-duty 14-gauge copper wire coil, a large 10-ounce magnet for secure mounting, and a 36-inch stainless steel whip, delivering maximum performance and clarity in a low-profile, high-impact thermoplastic design.

This is a high-performance magnet mount mobile antenna featuring a patented low-loss 10-gauge silver-plated coil, a durable high-impact thermoplastic body, a 62.5-inch 17-7 PH stainless steel whip, and 3000-watt power handling capability, making it an exceptional choice for maximizing transmission range.

This antenna is engineered for professional truckers, boasting a 49-foot stainless steel whip, a large center-loaded coil with increased power handling capability up to 3500 watts, a static-reducing weather cap, and a durable 10-foot shaft design that ensures outstanding CB communication performance.

Our customers choose Wilson Antenna products for their superior performance, durability, and versatility, as evidenced by:

Wilson Antenna is a company built on a strong foundation of core values that guide every aspect of our operations and products. Our values include:

Wilson 1000 Roof Antenna
