Windhoek office energy storage

Provide sustainable solutions to energy generation

Renewable Energy Engineering is a field that involves the design, development, and implementation of technologies that harness renewable energy sources such as wind, solar, hydro, geothermal, and biomass. This approach aims to provide sustainable solutions to energy generation and distribution, reducing the carbon footprint and contributing to the fight against climate change.

At Windhoek Consulting Engineers Company (WCE), we specialize in renewable energy engineering solutions that are tailored to meet the specific needs of our clients. Our team of expert engineers and technicians are equipped with the latest technologies and tools to deliver high-quality and cost-effective solutions.

We offer a wide range of renewable energy engineering services, including feasibility studies, system design and optimization, installation and commissioning, maintenance, and monitoring. Our solutions are designed to maximize energy efficiency, reduce costs, and minimize environmental impact.

Our renewable energy engineering solutions are ideal for clients in various industries, including residential, commercial, industrial, and government sectors. By implementing our solutions, clients can reduce their reliance on traditional energy sources, save on energy costs, and contribute to a greener and more sustainable future.

At WCE, we are committed to delivering exceptional renewable energy engineering solutions that meet the highest standards of quality, safety, and environmental responsibility. Contact us today to learn more about how we can help you harness the power of renewable energy.

ConServ Engineering Services is involved in a wide range of Services in the Solar Industry. We are the Distributor of SUNSET-Solar in Namibia. From there we source high quality made in Germany Equipment for all Solar PV and Thermal systems. No matter if you need a solution for your Camper, your Farm or want to install a Grid-tied PV-system.

Further we provide a large range of Solar Thermal solutions, starting with Domestic Solar Hot water system up to an Industrial Solar-Thermal systems for Hotels & Hospitals

In order to provide that service we stock a large variety of Hot Water Storage tanks, Solar-collectors and control solutions.
