Rooted in the expertise garnered by its strategic partnership with LA SOLAR GROUP, founded in 2011 in the USA, SOLARA has harnessed this accumulated knowledge to drive sustainable development in Armenia. Situated within the Alliance economic zone, the LA SOLAR plant, a strategic partner [...]

**Solar Market Outlook in Armenia** The solar market industry in Armenia is strong and has showcased consistent growth over the past decade or so. In 2014, the government launched the Scaling Up Renewable Energy Program for Armenia (SREP Armenia) as part of its commitment to promote renewable energy sources.

This new program serves as an update to the Renewable Energy Roadmap that was launched in 2011. It specifies the targets for the deployment of renewable energy infrastructure in response to the aging conventional energy infrastructure in the country. At the same time, the government wanted to boost the country's energy security, while also lowering the risk for potential renewable energy investors.
