The above documents are available at:

The Energy Regulation Board held a workshop regarding the new regulatory framework for mini-grids in March 2019, to provide clarity for stakeholders. In addition, it issued responses to questions raised on the framework. The following relevant documentation is available:

1. Panel discussion: Practical Capacity Building Workshop of 6th March 2019 by ERB, IAEREP TA1 and TA2 chaired by ERB, available at:
2. Responses by the ERB to specific aspects raised in the open letter by the Mini-Grid Industry Representatives, available at: & A_Mini_Grid_Regulations_Roadtesting.pdf

The certificate is optional and there is no minimum investment required.

It can be obtained through the ZDA website - processing fee of ZMW 2,133.30 is due upon submission of the application and a certificate fee of ZMW 12,783.30 upon issuance of the certificate.

Developers investing more than USD 500,000 (or equivalent in other currency) in off-grid electricity generation may be entitled to:

Developers can also receive non-fiscal incentives, including investment guarantees, protections against nationalization, and facilitated issuance of an investor's work permit.

Developers investing USD 250,000 to USD 500,000 (or equivalent in other currency) are entitled only to the non-fiscal incentives mentioned above.

Furthermore, losses can be carried forward for up to 10 years in the case of electricity generation projects.
