Zeon Charging was started in 2019 to invest into the evolving electric vehicle ecosystem. As passionate electric car owners and enthusiast since 2017, we have driven over 1, 00,000 Kms collectively till 2020. This experience of being electric car owners has given us great insights

Our mission is to accelerate the adoption of Electric Vehicles (EVs) there by making mobility more sustainable. By catalysing EV adoption we endeavour reduce our nation's dependence on imported oil and make our air cleaner.

Zeon Charging is building the infrastructure needed to enable the EV Revolution in India. We are installing electric vehicle chargers at convenient locations throughout the nation which would enable EV owners to travel long distances without the worrying about running out of charge. We are partnering with businesses that are frequented by EV owners such as restaurants, shopping malls and other commercial locations to install chargers in their car parks. As charging stations become more prevalent, car buyers will confidently choose EVs as concerns about chargers are addressed.

A typical fast charging stop for an electric vehicle would take between 20 to 60 minutes. This would be an ideal time for travellers to take a break for coffee, food and shopping. We are partnering with office campuses, restaurants, retail shopping centres, hotels, fuel stations, cinema halls, parking lot operators, and other stakeholders to make it easier for everyone to drive electric.

As our location partners your business premises will become the preferred choice for Electric car owners. We will install EV chargers in your customer car parks and all costs related to this will be on us. You may also choose to become our Franchise by investing in the charging infrastructure at your premises. All travellers wanting for a quick EV charge will become your customers inevitably.

**Mission:** Zeon Charging's mission is to accelerate the adoption of Electric Vehicles (EVs) in India by building a robust charging infrastructure that enables convenient, accessible, and reliable charging solutions. By partnering with businesses and installing EV chargers at strategic locations across the country, Zeon Charging aims to make electric mobility more sustainable, reduce the nation's dependence on imported oil, and contribute to a cleaner, greener environment.

**Vision:** Zeon Charging envisions a future where electric vehicles are the norm, and every driver can

## Zeon charging fee

confidently travel long distances without worrying about running out of charge. The company seeks to be a key catalyst in the EV revolution, transforming India's mobility ecosystem by providing a seamless charging experience. Through widespread infrastructure development and strategic partnerships, Zeon Charging aims to lead the way in making electric transportation the preferred choice for every Indian.

Zeon Charging offers a unique and lucrative franchise opportunity for businesses looking to become part of the growing electric vehicle (EV) ecosystem in India. By partnering with Zeon Charging, franchisees can play a key role in the EV revolution while benefiting from increased foot traffic and customer loyalty.
